

# Marketing Offer based on Google Play Apps' reachability

by Panagiota Giotopoulou & Georgia Vlassi

Professor: Damianos Chantziantoniou  
Assistant Professor: Spyridon Safras

# Agenda

- ▷ Business Case
- ▷ Process
- ▷ Results
- ▷ ETL Analysis
- ▷ Challenges
- ▷ Q&A

# Business Case

# BUSINESS ANALYSIS

## BUSINESS GOALS

Support Marketing Team to build business proposals addressed to potential customers. These proposals can provide analytics with regards to sales, price and advertising capabilities of Google PlayStore Apps.

The goal is to build personalized offers based on the nature of the potential customer's product itself.

## TECHNICAL BUSINESS REQUIREMENTS

- Gather, analyze and transform data found in Google Playstore dataset
- Clean and update the dataset
- Perform ETL processes
- Visualize the results and communicate them to the business stakeholders

# BUSINESS STAKEHOLDERS

This project is addressed to internal stakeholders that are interested to build data driven marketing propositions addressed to potential customers with end target to secure their marketing campaigns. Such customers might be advertising companies or the marketing department of a company.

1.

# PROCESS

How we did it?

# Data Cleaning, Import, Transformation & Visualization

## Data Cleaning

For the data cleaning process we used **VI editor** to generate queries instantly and **Visual Studio** to run the whole process automatically

## Import & Transformation

The data import process took place in **Visual Studio & MSSQL**

## Data Visualization

The data visualization process took place in **Power BI**

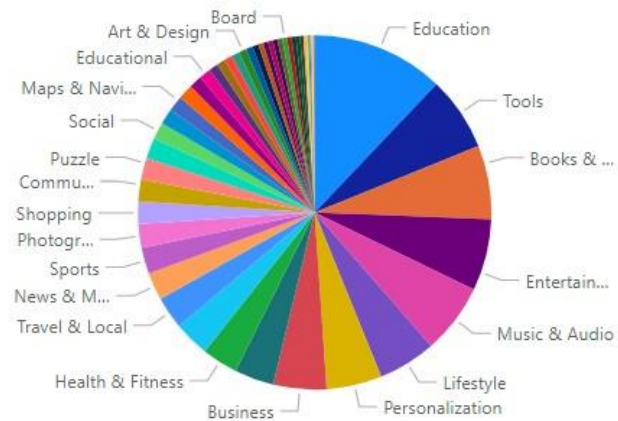

2.

# RESULTS

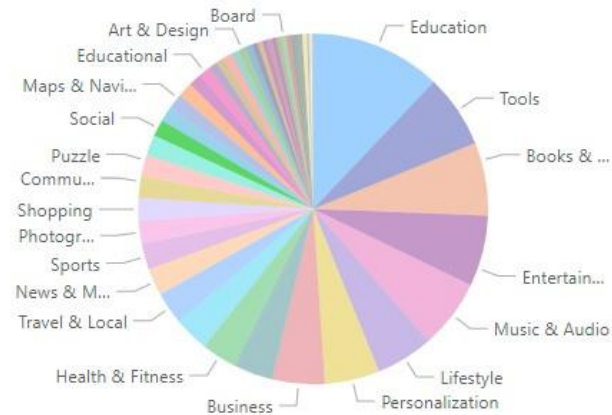

What is the outcome?

# CUBE

# 4. CHALLENGES

*Our biggest challenge was to pick the right dataset in terms of size, complexity and potential business outcome*

Thanks!

**Any questions?**
